Acid Rain Program: Notice of Exception to Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of exception to regulations (40 CFR Part 72).

SUMMARY: Title IV of the Clean Air Act authorizes the Environmental Protection Agency (EPA) to establish the Acid Rain Program. During Phase I (1995-1999) of the program, units subject to sulfur dioxide emissions limitations are required to account for any emissions resulting from reduced utilization of the units and shifting of electric generation from the units to other units or generators. Each unit is included in a dispatch system, and the accounting for reduced utilization is conducted on a dispatch-system basis. Under § 72.33(b), a unit may submit an identification of dispatch system, i.e., a request to establish a given group of units as a dispatch system. The regulation requires the submission to be made by January 30 of the first year for which the dispatch system is to be used for reduced utilization accounting.

The Agency hereby gives notice that on May 3, 1995, Midwest Power System, Inc. submitted an identification of dispatch system to take effect starting in 1995 and a request for an exception to the January 30 submission deadline. By letter dated May 31, 1995, the Agency granted the request and accepted the identification of dispatch system. The May 31, 1995 letter sets forth the basis for granting the request.

SUPPLEMENTARY INFORMATION: The USEPA Office of Water's interest in trace metals determinations has been driven by the development of ambient water quality criteria (WQC) in response to Congressional mandates in the 1987 Water Quality Act. Ambient water quality criteria require determinations of metals at levels significantly lower than those required by technology-based effluent limits or achievable by routine environmental laboratory analyses.

The Office of Water's purpose in sponsoring this workshop is to assist State and Regional authorities, regulated community, and commercial laboratories in understanding the requirements and techniques necessary to determine trace metals at EPA's ambient WQC levels. This workshop
